ND: non disponible

* Standardisation sur la population française 2009 (Projections de population Insee (scénario central) 2007-2042).

Taux d’exclusion = rapport entre le nombre de personnes de 50 à 74 ans exclues du programme pour des raisons médicales et la population cible INSEE sur la période évaluée.

Taux de participation = rapport entre le nombre de personnes dépistées sur deux années et la population cible INSEE de laquelle ont été soustraites les personnes exclues sur cette période (pour des raisons médicales).
